Studies Currently Recruiting Participants

Speech & Vocal Communications Study ^[1]

We are currently recruiting pediatric participants ages 8-16 for a study examining voice, speech and communication, in children with autism and children with typical development. Participants will be compensated \$200 for completion of all study procedures, which include diagnostic screening, neuropsychological evaluation, and MEG and MRI scans. For more

information please contact carly.demopoulos@ucsf.edu [2]

The Sweet Dreams Sleep Intervention for Children with Autism Spectrum Disorder [3]

Currently recruiting children diagnosed with ASD between the ages of 1-5 (12-60 months) who have trouble with sleep. For more information, please contact us at (415) 502-4561.

A Double-Blind Placebo-Controlled Study of CM-AT for the Treatment of Autism in Children With All Levels of Fecal Chymotrypsin [4]
